Subject: SEMS Release 1.7/3.10 Production Deployment - Cancelled

SEMS Users;

The SEMS 1.7 deployment scheduled to begin tonight is cancelled. This change in deployment schedule is necessary in order to ensure access to the SEMS Production environment this weekend in support of the continued response to the Gold King Mine situation. We will work with NCC to reschedule the deployment as soon as possible. We apologize for any inconvenience, and appreciate your patience and understanding regarding the cancellation.

US EPA Headquarters (S-4672)
